

Library WiFi Certificate Procedure – Mac OS X

1. Connect to public WiFi Network
2. Open **Safari** and go to <http://172.30.101.15/ssl/ca.der>
You will be prompted to download the **ca.der** certificate. Download the file to a place where you can find it easily.
3. Open up Keychain Access by searching it on Spotlight (clicking the Magnifying glass located on the upper right corner).

4. Select **File > Import Items**. Navigate to the previously downloaded **ca.der** file. Select **System** as "Destination Keychain." Press **open** and enter password when prompted. Then, log off and log back in.

On some versions of Mac OS, you also need to do the following:

- a. Right click on the certificate in Keychain Access and select **Get Info**
- b. Expand the **Trust** section
- c. Under **When using this certificate** select **Always Trust**

The certificate is now imported and you are now ready to use the Library's WiFi network in its full capacity. Enjoy!
