PRESS RELEASE –May 15, 2019 Executive Session Item on Possible Investigation of Disclosure of Information

May 17, 2019

The City Council met in Executive Session on May 15, 2019 to discuss and consult with the City Attorney for legal advice regarding a possible investigation into inappropriate disclosure of potentially privileged communications by administrative personnel or elected officials. As discussed in the public portion of the April regular Council meeting, the potential leakage or disclosure involved the November 2018 Title VII Hostile Work Environment Notice and subsequent FB postings that surfaced.

Due to the confidentiality of discussions held at the May 15, 2019 Executive Session, the item was not brought forward on the formal Council agenda that night but will move forward on the June 12 regular Council meeting for discussion and possible action. This will allow full transparency on any decision of the City Council.
